Bernalillo County Assessor's Office

Application for Head of Family Exemption: \$2,000

Section 7-18-17(C) of the law provides a penalty which states in part as follows: "Any person intentionally claiming and receiving the benefit of an exemption to which they are not entitled is guilty of a misdemeanor and shall be punished by a fine of not more than one thousand dollars (\$1,000.00)."

Please Mail or Fax to:
Bernalillo County Assessor's Office
P. O. Box 27108
Albuquerque, NM 87105
Phone #: 505-222-3700
Fax #: 505-222-3770

UPCE: _____

Ownership on Assessment Record: _____

Property Address: _____

By signing below, I certify that this is my primary residence and I am not claiming the head of family exemption in any other county in the State of New Mexico.

Signature of Assessed Owner: _____

Daytime Phone Number: _____

Email Address: _____

Date: _____

Pursuant to HB 54 (2011) § 20, as used in this section, "head of a family" means an individual New Mexico resident who is either:
(1) a married person, but only one spouse in a household may qualify as a head of a family;
(2) a widow or widower;
(3) a head of a household furnishing more than one-half the cost of support of any related persons;
(4) a single person, but only one person in a household may qualify as a head of family; or
(5) a member of a condominium association or the entity who owns property tax through the association.

For Office Use

Exemption Previously Claimed on UPCE: _____ Removed: Yes ___ No ___

Series of 2012 _____

AFFIDAVIT OF LOSS

I, **MARIA YVETTE AREVALO**, Filipino, of legal age with an address at 55 Vizayas St. Filipinas Village, Brgy. Mandalay, Marikina City, Philippines, after being duly sworn in accordance with law, depose and state:

1. That I am a regular subscriber / user of a Globe Mobile SIM Card with No +639178127397,
2. That in the afternoon of January 17 2016, a thief entered into our residence and took my Apple 6 plus with the said SIM Card inside our house,
3. That I have reported this incident to the police and I am attaching a certified true copy of a blotter report in this affidavit as Annex,
4. That despite diligent search and efforts to locate said cellular phone, I could not find the same such that I now believe that said is now lost beyond recovery together with the aforesaid SIM Card,
5. As such, I am executing this Affidavit of Loss to attest to the truth of the foregoing and in support of my request / application for the replacement of the said SIM Card and for whatever purpose it may serve.

IN WITNESS WHEREOF, I have hereunto set my hand this _____ at _____, Philippines

MARIA YVETTE AREVALO
AFFILIANT

ACKNOWLEDGMENT

BEFORE ME, a Notary Public for and in the (Province/City/Municipality) of _____ personally appeared _____ with Community Tax Certificate No. _____ issued on _____ at _____ personally known to me (or whom I have identified through competent evidence of identity) and who represented to me that he/she signatur on the foregoing instrument was voluntarily affixed by him/hers for the purposes stated in the instrument and who declared that he/she has executed the foregoing instrument as his/hers free and voluntary act and deed.

The first SIM cards (full SIM) were considerably larger than those used today. I lost said SIM card on (insert date here) and that I exerted all efforts to locate the same but I could not remember exactly where I placed/left it and it is considered lost for all legal purposes; 3. If you already have a SIM that you're using in your old phone, you can insert it into the new phone and start making calls, texting, etc. However, if you're a new subscriber, or don't have a SIM card from your previous phone, you need to sign up for an account plan with your favorite network to be able to make calls. During sign-up, you provide vital information about yourself and agree to pay a certain amount monthly as stipulated in the plan. This information is stored in the company's database. After signing up, your network operators will provide you a SIM card which you'll then use to activate the plan and start using your phone. With a dimension of 85 mm x 53 mm, they're roughly the size of a credit card and have gone out of use. Most phone models made after 2018 use eSIM. How a SIM card works Once you buy a new GSM phone, you need to connect it to a mobile phone network to make calls. These include: Integrated Circuit Card Identifier (ICCID): The ICCID is 19-digits long and is the primary account number. You'll also need to check the SIM number, which again you can find on your original purchase paperwork. I am the holder of a Subscriber Identity Module (SIM) Card Number (insert number here) issued by Globe Telecom; 2. MORE FROM QUESTIONSANSWERED.NET If you bought your phone through a mobile carrier and picked it up at a physical store in person, it could be that it's already been activated for you. Before you can activate or register a SIM card online, it's helpful to know exactly what a SIM card is and why it's important for your ability to use a mobile device. I am a regular user of a Globe Mobile Subscriber Identity Module (SIM) Card with No. _____ since 2007; 2. The SIM card links your account to your phone and, through the International Mobile Subscriber Identifier (IMSI), identifies your phone to the network. That way, networks can link what you do on your handset to your account and charge you accordingly. International Mobile Subscriber Identity (IMSI): The IMSI is 15 digits long and occupies 64-bit space. The new phone will connect to the GSM network that the SIM card is tied to, e.g., T-Mobile or AT&T, without requiring approval. The mobile SIM is a necessity for all GSM phones. Developed and overseen by the European Telecommunications Standards Institute (ETSI), GSM is used to describe protocols for second-generation (2G) cellular networks. Authentication Key or Ki: The Ki occupies a 128-bit space in the SIM memory and is used to authenticate your phone on the mobile network. It encompasses Mobile Country Code or MCC (the first three digits), the Mobile Network Code or MNC (2 to 3 digits next to the MCC), and Mobile Subscriber Identification Number or MSIN (remaining digits after the MNC). Location Area Identity (LAI): The LAI is a series of digits representing a specific usage location. Each location has its unique identification number. That's why, when you switch your SIM card from one phone to another, you can use the same phone number to get calls and texts. Do I Need to Activate My SIM Card? Before you take the step of activating your SIM, it's also important to consider whether this step is actually necessary for you. On _____, at about noontime, when I left the premises of _____ after dining in, I also left my cellular phone where the said SIM Card is inserted; 3. Said SIM Card was not confiscated by any officer of the law by reason of any violation of any law, ordinance, presidential decree or rules and regulation of anything; and neither was it offered as collateral for any loan; 4. Doc. It is the primary network type used all over the world. A notable exception is mobile devices that operate on a Code Division Multiple Access (CDMA) network—an additional network type used in the United States and provided by carriers like Verizon Wireless, Virgin Mobile, and Spring. (US Mobile) Different SIM card sizes exist with different memory capacities ranging from 32KB to 128KB. If you're able to make calls or send texts from your phone without using a wireless connection, that means that your SIM card is already activated and you don't need to do anything further to register it. Finding the Right Information When your SIM isn't already activated, you'll need to take matters into your own hands. The operator's mobile network is divided into smaller locations referred to as Local Area. I am executing this Affidavit to attest to the truth of the foregoing facts and in support of my application for the replacement of the said SIM Card and for whatever legal intents and purposes it may serve. SIM cards store relevant information needed in identifying and authenticating subscribers on mobile telephony devices to receive calls, send SMS messages, or connect to mobile internet services with their mobile devices. _____ issued on _____ at _____. It is used in identifying an individual operator's network. Learn more about how to do that with this simple guide to SIM activation. What Is a SIM Card? First things first: knowing what you're doing. You may need your device's IMEI or ID number. Entering the PUK incorrectly ten times in a row permanently disables the SIM card. Users can swap SIM cards from one GSM phone to another without loss of data. Phones using CDMA may have SIM Card or SIM card slots in line with the LTE standard requirement or for use with foreign GSM networks. Types of SIM card Variation in SIM sizes. In addition, SIM cards are also used in satellite phones, smartwatches, computers, and cameras. It is assigned by the network operators during personalization and is unique to each SIMS. The authentication key is stored in the operator's database. A few minutes after noticing that my cellular phone is not with me, I returned to the said restaurant and inquired to the security guard and waiters-in-charge if they have seen a cellular phone in the spot where I was seated; 4. The number may be listed as ICCID, CSN or EID. Personal Identification Number (PIN) and Personal Unblocking Key (PUK): Both of these numbers serve security purposes. Phone networks set a default PIN which you can change to a more secured digit that you can easily remember. Enabling PIN protection means that you have to enter your PIN whenever your phone is switched on. By leveraging the SIM Tool Kit standard, basic applications like chatting, cell broadcast, phonebook backup, location-based services are also possible. Got a new phone that you want to activate or an old phone that you want to start using on a different provider network? X-----X AFFIDAVIT OF LOSS I, (insert name here), Filipino, of legal age, single and a resident of (insert address here), Philippines, after having been duly sworn to in accordance with law, hereby depose and say that: 1. Other information stored includes a Short Message Service Centre (SMSC) number, Service Provider Name (SPN), Service Dialing Number (SDN), Value Added Service (VAS), etc. Entering the wrong PIN three times in a row blocks the SIM card. It's the mechanism through which your phone number gets connected to your phone. If it's not there, it may be on the reverse side of the SIM card (not on the side with the gold chip). Activate With Your Carrier Your mobile carrier likely has an option for you to register your SIM card online. Also, the same unique piece of information regarding ICCID, IMSI, etc., are stored on the integrated circuit regardless of the size. REPUBLIC OF THE PHILIPPINES) CITY OF MANILA) S.S. No. _____; Page No. _____; Book No. _____; Series of 2013. (Insert Name of Affiant) Affiant SUBSCRIBED AND SWORN to before me this _____ day of _____ in the City of _____ Philippines, affiant having exhibited to me (his or her) community tax certificate with no. This memory space is independent of the card's size. SIM cards are tiny plastic cards that contain a gold chip that looks like something that belongs in a computer. REPUBLIC OF THE PHILIPPINES) City of Manila) S.S. X-----X AFFIDAVIT OF LOSS I, _____, of legal age, Filipino, single, and a resident of _____, Philippines after having been duly sworn in accordance with law, hereby depose and say that: 1. I am executing this affidavit to attest to the foregoing facts; IN WITNESS WHEREOF, I have hereunto set my hand this _____ day of _____ in the City of _____, Philippines. I failed to recover my cellular phone and the said SIM Card despite diligent search and earnest efforts to contact and locate said phone, and I consider the same as lost and can no longer be found; 5. You can perform a search for "[your carrier] sim activation" or call the carrier's customer service number to find out where to enter your information. What Devices Use SIM Cards? It's not just smartphones that make use of SIM card technology. Other popular types of SIM and their sizes are: Mini-SIM: 25 mm x 15 mm Micro-SIM: 15 mm x 12 mm Nano-SIM: 12.3 mm x 8.8 mm Phones using Nano-SIMs include Samsung Galaxy S6 & S7 and iPhone 5 & later versions. Samsung Galaxy S4 & S5, iPhone 4 and 4S use large Micro-SIM cards. With a 6mm x 5mm dimension, the embedded SIM (eSIM) is the next generation SIM. You then will need a PUK number from the network operators to unlock it. _____ Affiant ID Details SUBSCRIBED AND SWORN TO before me this _____ day of _____ 201 in Manila City, Philippines, affiant exhibited her _____ Identification Card as herein above indicated. If not, it may be on the device's original packaging or accessible through your device's settings. No. _____ Page No. _____; Book No. _____; Series of 2013. It's possible that this information is included with paperwork if you purchased your SIM and device together. It incorporates sections like Individual Account Identification (IAI), Issuer Identification Number (IIN), checks digits, etc. Start by locating some important numbers. Affiant states nothing further. That means it's time to activate your SIM card. There's a reason for that — the SIM card is what allows your mobile device to connect to a cellular network. Doc. However, you can still connect to WiFi. Information storage: The SIM card stores text messages, up to 250 contacts, and other vital information used in identifying subscribers, authenticating them, and providing security. Features of a SIM card The tiny integrated circuit at the back of the SIM contains its primary features. Other mobile devices that can connect to a cellular network, including smartwatches, tablets, e-readers and others may also use SIM cards. It's important to find out exactly where to put the card in your device to ensure proper function after you register or activate your SIM card. A SIM card (Subscriber Identity Module) card is a tiny, portable memory chip or integrated circuit containing unique information that identifies it to a specific mobile network. The SIM card is also what makes your phone yours. Benefits of SIM cards SIM cards are beneficial in two key ways. SIM cards and GSM The SIM card is fundamental to the Global System of Mobile Communication (GSM) network. The PIN prevents unauthorized access to your phone. IN WITNESS WHEREOF, I have hereunto affixed my signature this _____ day of _____ in Manila City, Philippines. Communication access: While you can still snap pictures, listen to downloaded music, and watch videos without a SIM, making calls, sending SMS messages, and connecting to mobile internet services like 3G, 4G, and 5G becomes impossible.

03.02.2019 · Go through all paperwork, internet bookmarks and files to find who they had accounts with.
